

## COMP TIA A+ CERTIFICATE PROGRAM

### SCHEDULE

#### Open & Ongoing

Sessions are scheduled on individual needs and participant availability.

Participants work independently and the coursework is self-paced. Participants should have prior experience in technology use and support.

Sessions are not held on observed holidays. A formal schedule is outlined upon enrollment.

### Master High Demand IT Skills

Unlock the essential skills to support today's digital and hybrid workplaces with the CompTIA A+ Certification Course. This hands-on program equips you to confidently handle hardware, software, and networking challenges in a fast-paced IT environment.

Gain expertise in installing, troubleshooting, and maintaining multiple operating systems, hardware devices, and network connections. Learn to address security vulnerabilities, configure mobile devices, and explore cutting-edge cloud computing and virtualization technologies.

Prepare to pass the CompTIA A+ Core Series Exams (220-1101 & 220-1102), covering the latest industry requirements, from SaaS applications to multi-OS environments. The training and certification is ISO 17024 compliant and meets U.S. DoD Directive 8140.03M standards.

Classes are flexible and scheduled based on enrollment needs, with 8 sessions per cohort. Join Pacific Coast Community Services to launch your IT career and gain a trusted industry credential.

**Pacific Coast  
Community Services**

Pacific Coast Community Services is a 501(c)(3) non-profit organization. Its mission is to provide training and long-term employment for veterans, persons with disabilities, and those re-entering the workforce.
